The **AL1Compact** System can also be integrated in a drapery track as a sliding shade. This way the shades can be moved sideways (for example to clear a doorway) and up and down like a conventional shade.

Sliding Shades

or

attached to the rings of
a Decorative Pole

The **AL1Compact** System attached to the rings of a decorative pole.

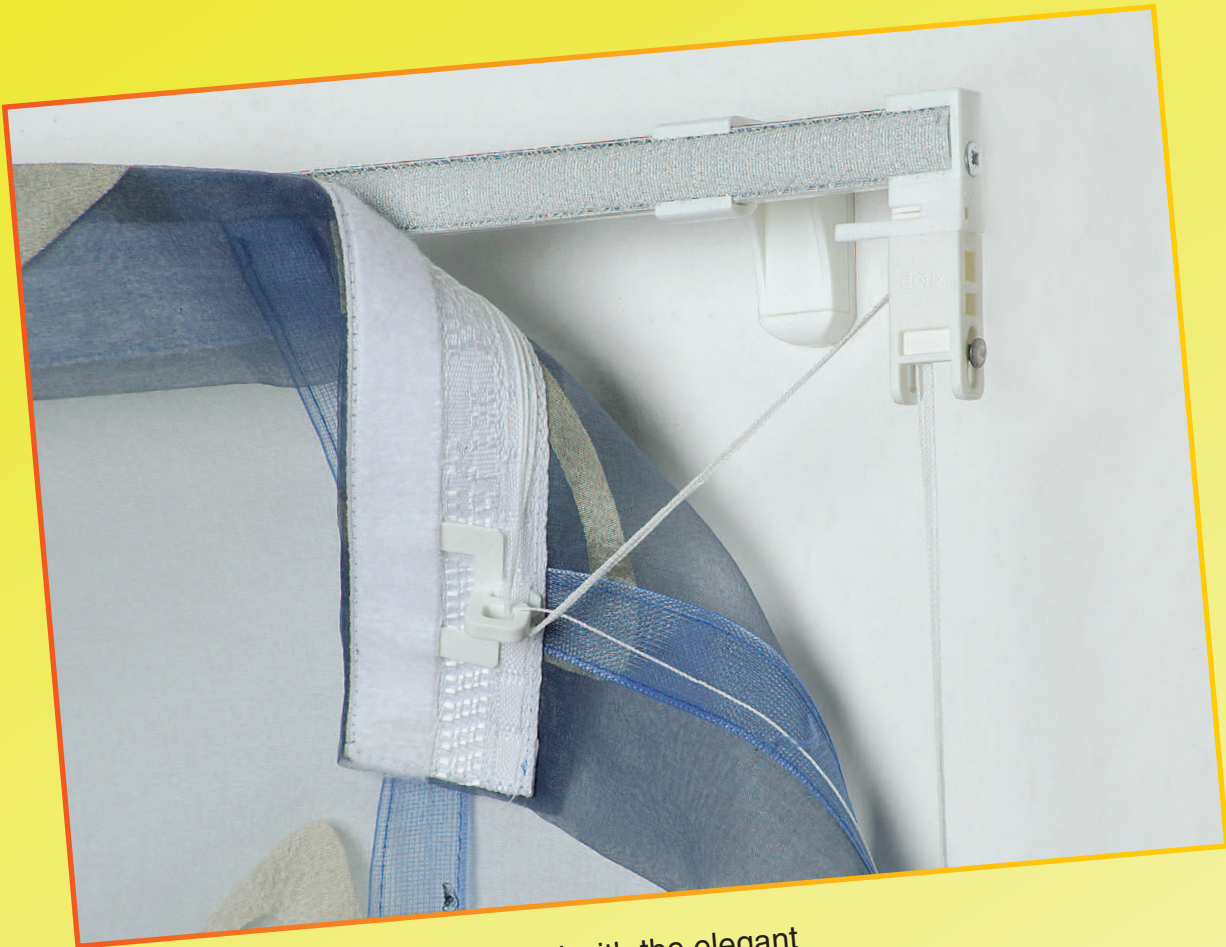

Clips attached to the back of the AL1 slat assure an even ring spacing.

DÖHLEMANN

The incredibly slim dimensions of the **AL1Compact** System offer many installation options with an unusual small projection.

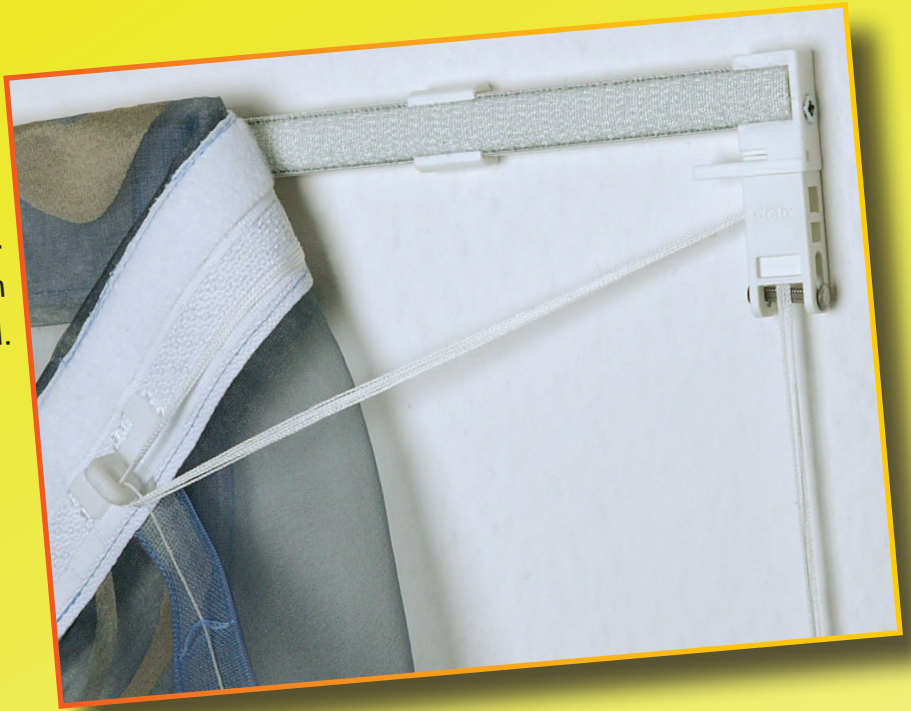

The all new horizontal pocket tape RTB in combination with the pull cord guides make cleaning the shades a breeze. The guides, pull cords and cord lock remain neatly attached to the shade during cleaning and will not tangle up.

The **AL1Compact** System installed with the elegant projector brackets. Once the base is attached to the wall, the projector is slid onto it, hiding the screw heads.

Wall mount with projection

With a thickness of only
3/8" the **AL1Compact**
System can be installed in
even the tightest spaces.
For example on a French
door or directly to the wall.
