## “Acoustic panels from döfix”

**Contemporary acoustic solutions ...  
more than just sound absorption!!**

**You have the need to significantly improve the room acoustics for a client but don't have the budget of making architectural changes?**

döfix Sono.Fix wall panels offer the opportunity to drastically optimize the acoustics in offices, meeting rooms or private residences.

**Transform a entire wall into an absorbing acoustic element.**

A variety of installation brackets allow to install Sono.Fix wall panels to either the wall or the ceiling.

**The sky is the limit...**

Get creative with shapes, colors and textures!!! Sono.Fix can be cut into any shape in dimensions up to 125 cm x 500 cm and can be laminated with any custom fabric. Transportation costs are minimized since the Sono.Fix sound mat can be rolled before it is processed into an acoustic panel.

Length up to  
500 cm

Width up to  
125 cm

**DÖFIX ACOUSTIC** Sono.Fix sound mat 15mm

**Acoustic art panels**  
**Acoustic-fabrics in 2 variations -**  
**frame-less or with döfix DesignFrame**  
& matching any interior

***This system allows to transform a common***

## MAGNET

## Sono.fix - “Quick and easy”

!

döfix Sono.Fix panels are the perfect acoustic solution suspended from the ceiling with stainless steel cables. An assortment of accessories and brackets guarantee a quick and straightforward installation. Acoustic ceiling panels have proven to significantly enhance room acoustics.

### “Silence from above” - The advantages of döfix Sono.Fix ceiling panels

1. döfix Sono.Fix ceiling panels prevent the reflection of sound waves from the ceiling.
2. Sono.Fix panels perfectly blend in and become part the rooms interior.
3. Sono.Fix acoustic panels also function as design objects. Size, shape and 3 dimensional waves can be individually chosen. Any decorative fabric can be used.
4. Costly structural measures are eliminated.

### How do döfix Sono.Fix sound absorbers work?

döfix Sono.Fix acoustic panels are made of a special sound absorbing acoustic material which can be laminated with döfix acoustic fabric Deco I, Deco II or any decorative fabric. The friction between the air molecules and the Sono.Fix acoustic panels reduces the sound energy and converts it into thermal energy. The significant reduction of resonance generates an enjoyable room acoustic.

## + DESIGN FRAMES

**NEED DIVERSITY?** It doesn't get any better!

The aluminum frame system "**Design Face Plate**" from dōfix is simple and sophisticated. The esthetic frames in **glossy white, brushed silver-, titanium & black** are simply attached around the acoustic panels with clips.

# SONO.FIX ROOM DIVIDER

## Acoustical Room division - custom made

### Acoustic dividers in living spaces • efficient utilisation of office space:

The dōfix acoustic system combines design and noise reduction in one. An acoustic room divider is a quick and efficient solution to lower the noise level. Combined with a variety of accessories from dōfix like the sliding panel system they are easily installed - right where you need it!!

1

### PRIVACY

Privacy protection - noise reduction  
Sliding panels made from acoustic panels  
create new design possibilities

2

### ROOM DIVIDER

Architectural structuring of spaces  
without the need of costly remodeling.

3

### CABINET DOOR

Doorless cabinets ? Here is the solution.
