döfix wave tape -

Flexiwave

- The iron-on "K" adhesive **eliminates the need to pin** the tape to the fabric.
  Once it is ironed on, the tape can be easily sewn-on.
- The spacing between the pins can be individually selected to **match the repeat in the fabric**.
- The **extraordinary springiness** of the Flexiwave tape assures **perfect and even waves**.
- Easy fabrication. Curtain pins can be inserted at the markers..
- Wave cord in Click Technology allows for an **effortless installation**. Glides can be inserted into the track at any position.
- Wave curtains made with the döfix Flexiwave system can be washed and dry-cleaned like a regular drapery.
